

Thank you for ordering Cambria quartz countertop from Ideal Surfaces. We're excited to make your countertop dreams a reality. We want your installation to go as smoothly as possible, so please take a moment to review all the steps that are required for your measurement and installation. If you have any questions, please coordinate with your designer.

PRE-MEASUREMENT CHECKLIST

- All sinks (including accessories), cooktops, slide-ins, ranges, dishwashers, etc. must be on the jobsite to ensure proper measurement and installation.
- All counters must be cleared before measuring.
- Farm/Apron sinks must be installed before measure date.
- All cabinets and panels must be set.
- Brackets and all supports must be installed prior to measure and installation.

Exceptionally Strong.

Exceptionally Beautiful.

PRE-INSTALLATION CHECKLIST

- Arrange for any appliance disposal, removal, or re-installation.
- Arrange for the disposal of sinks, plumbing fixtures, and old countertops.
- Existing tile countertops must be removed prior to installation.
- Take note of the condition of appliances, sinks, and plumbing fixtures.
- Take note of cabinet levelness, the condition of cabinets after tearout, and the condition of existing wallpaper, tile, or paint on walls.
- Exterior doors may need to be open and top drawers removed during installation.
- Notify Ideal Surfaces if drilling is required for the dishwasher air gap.
- Provide drilling information for faucets, soap dispensers, H2O systems, etc..
- Sinks, range/cooktop, downdraft, and faucet/air gap fixtures are required to be onsite for countertop install to be completed.
- Arrange for the disposal of appliances, plumbing fixtures, sinks, and old countertops.
- All plumbing, electrical, or HVAC must be disconnected prior to arrival.
- Please be sure driveways/entryways are clear to ensure our installers will have safe access into the location.

*Thanks for
your Business!*
